## Key Observations

### Berry Category at Retail – Blueberries and A/O Berries – w/e 06.13.20

#### Fresh conventional segment

- Consistent with last week, conventional blueberries increased their YoY retail volume and dollar growth rates. For week ending June 13, volume is up +4% and retail dollars are up +14%. Retail pricing continues to trend down on a weekly basis, dropping only -\$0.05/lb this week. However, retail pricing remains higher (+\$0.33/lb) than same period in 2019 contributing to stronger growth in retail dollars.
- Also, as evident in the last several week's of data, fresh conventional competitive berries grew volume at a faster pace YoY than did blueberries, up +16% in volume, but trailing blueberries slightly with retail dollar growth +12%. This week competitive berries are down slightly in pricing, -\$0.02/lb (-1%) vs. the previous week and -\$0.11/lb (-4%) YoY.

#### Fresh organic segment

- Although still below 2019 prices, the retail price of fresh organic blueberries is up again slightly this week to \$6.19/lb increasing only +\$0.02/lb from last week, but still significantly below (-\$0.83/lb) same period last year – fresh organic blueberries experienced a +26% growth in volume and are up +11% in dollars.
- Competitive organic berries outperformed blueberries this week in volume and dollar growth – fresh a/o organic berries are up +30% in volume and +13% in dollars. Competitive fresh organic berry retail pricing remains below \$5.00/lb this week, up only +\$0.03/lb (+1%) for the week and down -\$0.65 (-15%) vs. year ago.

## Key Observations

### Berry Category at Retail – Blueberries and A/O Berries – w/e 06.13.20

#### Frozen conventional segment

- Although the weekly sales velocities continue to trend slightly down from their March highs, frozen conventional blueberries maintain their record-setting YoY growth at retail. Volume is up +29% and dollars are up 34% YoY.
- Competitive frozen conventional berries are trending slightly ahead of blueberries this week with growth in volume of +36% and dollars up +42%
- Pricing in this segment – for both frozen conventional blueberries and competitive berries continues to be very stable week to week, although they are both priced about 4% to 5% higher than last week.

#### Frozen organic segment

- Consumers also continue to show enthusiasm for frozen organic berries - volume and dollar sales of frozen organic blueberries are both up +40% this week. Competitive frozen organic berries lag blueberries this week with volume up +33% and dollars up +39%.
- Retail pricing in the frozen organic segment have been relatively stable week to week and vs. 2019. however competitive berries retail price did increase slightly this week, up +\$0.14/lb (+3%) WoW and +\$0.21 (+5%) YoY.

## Trends in Fresh and Frozen Blueberry Sales w/e 06.13.20

- Blueberry sales for the second week of June, w/e 06.13 continue to grow YoY, with total fresh and frozen blueberry volume up +9% and dollars up +15% with units trailing slightly at a +8% growth rate as consumers migrate to larger, better value sizes
  - Trends set by consumers' response to the COVID-19 crisis continue to hold – the big growth drivers are all frozen, and fresh organic blueberries which continue to trend ahead of conventional fresh in volume and dollar growth rates.
- Fresh conventional is up +4% in volume and +14% in dollars while fresh organic is up +26% in volume and +11% in dollars
- Frozen conventional is up +29% in volume and +36% in dollars while frozen organic is up +40% in volume and +40% in dollars

### BLUEBERRIES - 6/13/2020

## Fresh Conventional Blueberries – Volume, Sales and Pricing Data

- Fresh conventional blueberries are up +4% in volume YoY and up +14% in retail dollars YoY for w/e 06.13
- Retail pricing on conventional fresh blueberries is up \$0.33/lb relative to 2019 and down -\$0.05/lb vs. previous week
- Total volume and dollar sales of fresh conventional blueberries for the month of May is highest of all months tracked below, however part of this increase can be attributed to variation in the number of weekly data points included in the NET monthly values, as May reflects 5 weeks worth of data, yet March and April reflect 4 weeks

## Fresh Conventional Blueberries Weekly Price Trend

Price per pound of fresh conventional blueberries increased sharply in 2020 by +\$2.92/lb from w/e 02.22 (\$3.85) to its peak on w/e 03.28 (\$6.77)

These elevated prices arrived earlier than they did in 2019, and were sustained through March of 2020

Since the peak on w/e 03.28, price per pound of fresh conventional blueberries declined sharply from the w/e 04.04 though the w/e 04.25

Price continues to fall, but the pace of the decline has slowed, now \$3.85/lb, +\$0.33/lb above 2019 pricing

## Fresh Conventional A/O Berries – Volume, Sales and Pricing Data

- Fresh conventional A/O berry retail dollars are up YoY +16% in volume and up +12% in dollars for w/e 06.13
- Volume of fresh conventional A/O berries in May is nearly double March and April
  - As noted previously, part of this increase can be attributed to variation in the number of weekly data points included in the NET monthly values

## Fresh Conventional A/O Berries Weekly Price Trend

In sharp contrast to fresh conventional blueberries, price per pound of fresh conventional A/O berries has been very consistent with 2019 trends

Price per lb of fresh conventional A/O berries steadily decreased from April to mid-May, but increased slightly w/e 5.23 and 5.30

Price per lb has decreased  $-\$0.02/\text{lb}$  since w/e 6.06, now  $\$2.63/\text{lb}$ ,  $-\$0.11/\text{lb}$  below 2019 pricing

## Fresh Organic Blueberries – Volume, Sales and Pricing Data

- For the w/e 06.13, fresh organic blueberries are up +26% in volume YoY and up 11% in retail dollars YoY
- May NET volume is 25% higher than 2019, and price per lb is -12% lower than 2019
  - Retail sales appear to be trending upwards from March, which is impressive given consumer stock-up behaviors (due to the onset of the COVID-19 pandemic) have subsided
- After steady declines in price per lb of fresh organic blueberries since mid May, pricing is up in June with the most recent week's pricing up +\$0.02/lb relative to the previous week (w/e 06.06).

## Fresh Organic Blueberries Weekly Price Trend

Changes in price per pound of fresh organic blueberries are fairly similar to patterns seen in 2019.

Overall, price per pound of fresh organic blueberries has decreased after peaking during w/e 03.28 at \$8.90/lb

However, June marks a positive shift, and price continues to climb upwards, with the most recent week's price up +\$0.02/lb since previous week

The current \$6.19/lb is -\$0.83/lb below 2019 pricing

## Fresh Organic A/O Berries – Volume, Sales and Pricing Data

- Fresh organic A/O berries are up +30% in volume YoY and up +13% in dollars YoY for the w/e 06.13
- Since the beginning of the 16 week period tracked below (w/e 02.22), fresh organic A/O berries have experienced +150% volume growth (+ 2,213,268 lbs) and +52% growth in dollar sales (+\$5.6M)
- Total volume of fresh organic A/O berries for the month of May is nearly double that of March
  - Again, part of this increase can be attributed to variation in the number of weekly data points included in the NET monthly values, however this is still a significant increase in total volume
