

## USHBC Blueberries in Retail Report: Q3 2022

The total blueberry category, inclusive of both fresh and frozen blueberries is **up** +**6.8**% **in dollars but down** -**2.2**% **in volume** for the third quarter of 2022 as compared to the same timeframe in 2021.

# 6.8%1 IN DOLLARS 2.2% IN VOLUME

#### **Market Situation:**

The decline in total blueberry volume sold at retail during the third quarter of this year is offset by higher retail prices as seen during the previous quarter. Food prices (including the berry category) have continued to increase due to inflation. The average retail price of a pound of blueberries has increased by +9.2% (or +\$0.40) since Q3 2021, retailing on average at \$4.69/lb. The average price per pound for all other berries has also increased slightly, up +4.5% (or +\$0.17) compared to Q3 2021 retailing on average at \$3.84/lb.

### Fresh & Frozen Blueberries: Q3 2022 vs. Q3 2021

#### **U.S. Blueberry Supply: Q3 Insights**

Joe Vargas, Director of Business Intelligence, U.S. Highbush Blueberry Council

- In the front end of Q3, retail sales were impacted by tight supply and higher prices of fresh blueberries due to an unseasonably late spring in the Pacific Northwest
- Despite higher prices, consumer demand for fresh blueberry taste, texture and health benefits stayed strong, with YOY dollar sales change (+7%) outperforming YOY volume change (-2%) by a full 9 percentage points
- With improved domestic supply at the end of Q3 and the arrival of abundant fruit from Oregon, Washington, Peru and Canada, we see retail volume and dollar sales surge during the month of September
